Contractor Dumpsters

A&B Disposal Services offers specialized dumpster rental solutions for contractors and construction professionals. We understand the dynamic nature of construction sites and provide flexible, reliable service to keep your projects on schedule. Our contractor dumpster rentals are designed to handle heavy debris and large volumes of waste, ensuring efficient disposal throughout your project's duration.

Residential Dumpsters

For homeowners tackling renovations, cleanouts, or landscaping projects, our residential dumpster rental service offers the perfect solution. We provide appropriately sized containers to fit your driveway or property, minimizing disruption to your daily life. Our team ensures prompt delivery and pickup, making your home improvement or decluttering project hassle-free.

Efficient Dumpster Rentals

A&B Disposal Services, Inc offers reliable dumpster rental solutions in the Piedmont Triad and surrounding areas. We understand that construction projects, remodels, and cleanups require flexible waste management options. That's why we provide multiple sizes of dumpsters, namely 17-yard and 30-yard dumpsters, for:

- Construction cleanups
- Storm and disaster cleanups
- Home building debris
- Home remodeling debris
- Spring/Fall cleaning projects
- DIY home projects

We offer commercial and residential builders packages, for projects that require both disposal and portable toilet services.

Streamline Your Project with Waste Management

Efficient waste removal is crucial for keeping your construction site organized and compliant. A&B Disposal Services offers tailored solutions to meet your specific requirements. Investing in the right dumpster for your project yields the following benefits:

- Efficiency, with streamlined waste management
- Cost-effectiveness, by avoiding fees caused by overloading a dumpster
- Safety, since proper waste management reduces the risk of accidents and injuries

Let A&B Disposal Services handle your waste management needs, allowing you to focus on your project.

✓ Septic Services

Septic System Installations

Our team assesses your property to determine the best system for your needs, ensuring long-term efficiency and reliability. We use the latest technologies and methods to install septic system that meet all regulatory standards.

Septic System Inspections

Our thorough inspections identify potential issues before they become major problems. Using advanced diagnostic tools, our knowledgeable staff provides comprehensive evaluations, ensuring your septic system operates smoothly. We offer detailed reports with actionable recommendations to keep your system in top condition.

Subsurface Septic Maintenance

Our team at A&B Septic Services ensures that the leach field and other subsurface components are functioning effectively. We utilize modern techniques to prevent blockages and promote efficient wastewater dispersion. Regular maintenance helps avoid costly repairs and extends the life of your septic system.

Septic Tank Pumping

Our state-of-the-art equipment ensures thorough cleaning, enhancing the performance and lifespan of your system. We recommend regular pumping schedules tailored to your specific tank size and usage.

Grease Trap Pumping

A&B Septic Services offers specialized grease trap pumping for restaurants and commercial applications. Our thorough cleaning process removes accumulated grease and solids, reducing the risk of clogs and backups.

Understanding Septic Tank Pumping Service

Septic tank pumping is a process that involves the removal of accumulated solids, sludge, and liquid waste from the septic tank. This maintenance step is crucial for preventing blockages that can lead to septic system failure.

What Happens During Septic Tank Pumping?

When you schedule a septic tank pumping service, a professional team arrives with specialized equipment. They will:

1. Locate the septic tank and access it through the manholes.
2. Use a vacuum truck to pump out the contents of the tank.
3. Inspect the tank for any signs of damage or potential issues.
4. Clean the tank thoroughly to ensure it functions optimally.

How Often Should You Pump Your Septic Tank?

The frequency of septic tank pumping depends on several factors:

- **Tank size:** Larger tanks require less frequent pumping.
- **Household size:** More occupants generate more waste, necessitating more frequent pumping.
- **Usage habits:** High water usage and waste disposal habits impact the frequency.

Recommended Pumping Frequency

Septic Tank Size	Household Size	Pumping Frequency
1,000 gallons	2-4 people	Every 3-5 years
1,500 gallons	5-7 people	Every 2-4 years
2,000 gallons	8-10 people	Every 1-3 years

Common Symptoms of Septic Tank Issues

- Slow drains
- Unpleasant odors
- Pooling water around the tank
- Gurgling sounds in plumbing
- Backups in toilets and sinks

Benefits of Regular Septic Tank Pumping

Regular septic tank pumping offers several advantages that contribute to the overall health of your septic system and property.

Preventing Costly Repairs

Routine pumping helps to avoid **blockages and backups**, which can lead to expensive repairs. By removing solids and sludge, you reduce the risk of damage to your septic system.

Extending Septic System Lifespan

Proper maintenance can extend the life of your septic system by preventing **wear and tear**. Regular pumping keeps the system functioning efficiently, reducing the likelihood of premature failure.

Protecting the Environment

Septic tank pumping helps to protect the environment by preventing the overflow of untreated waste water. This practice ensures that contaminants do not seep into the groundwater or nearby water sources.

Why Choose Us?

With over 18+ years of experience we have the knowledge and equipment to handle any septic or sewer issue. Our team is dedicated to providing excellent customer service and ensuring the satisfaction of our clients.

Tips and Facts

How many portable toilets do I need for my event?

There are several factors to consider, such as whether food and or beverages will be served. Consider if there are other restroom facilities available as well as the duration of the event. For recommendations on the number of portable toilets needed for your specific event, contact A & B Portable Toilets, Inc.

How many portable toilets do I need for my construction project?

Typically, you will need one toilet for every 10 workers on a construction site.

How many washes will my sink hold?

Our portable sinks hold about 200 hand washes.

How much does a dumpster hold?

Our 17-yard dumpster has a capacity of approximately two tons, with some additional flexibility. The 30-yard dumpster can accommodate up to four tons, also with some extra capacity if needed.

How long will I have the dumpster for?

For contractors, we offer multiple exchanges throughout the month. Residential customers can retain the dumpster for up to 14 days. Please note that additional fees may be applied for usage beyond the 14-day period.

What can't I put in my dumpster?

Certain items are prohibited from disposal in our dumpsters. These include hazardous materials, electronics, batteries, tires, large appliances, and any form of liquids.

What can I put in my dumpster?

Our dumpsters are suitable for disposing of general trash, wood, furniture, yard waste, construction debris, and demolition materials.

Do you offer emergency septic system services?

Yes, A&B Septic Services offers emergency septic system services.

How often should I have my septic system pumped?

A&B Septic Services recommends having your septic system pumped every three to five years.

Do you offer RV septic tank pumping?

Yes, we can service all size RVs and motor homes.
